## **Preface**

This user manual teaches you about the PC to Video Converter box and how to make full use of its features. Information contained in this manual has been carefully checked for accuracy; however, no guarantee is given to the correctness of the contents. The information in this document is subject to change without notice.

## **Safety information**

Do not disassemble the PC to Video Converter box. Touching the product's internal parts could result in injury. In the event of a malfunction or if the PC to Video Converter box is accidentally broken open, take the product to an authorized service center for inspection.

## **1. Introduction**

The CPT-385A PC to Video scan converter box is designed to convert a variety of computer images, from 640x480 up to 1600x1200, to interlaced NTSC or PAL video. It support output formats including composite and S-Video. It is ideal for use in applications like video conference, home theater, business presentation, lecturing room or viewing PC image on TV.

## **2. Main Features**

- Automatically detects and down converts the incoming PC images to NTSC or PAL.
- Support high resolution PC input up to UXGA (1600x1200@60Hz).
- Scale down PC video to Composite/S-Video.
- Switch between NTSC/PAL
- Image Overscan/Underscan selection.
- Easy to install and simple to operate.
- Easy to carry with palm size design.
